MAXIMUM PERFORMANCE & OUTPUT

USE ME FOR

- Soft concrete paviors
- Cement screed
- Grit stone
- Abrasive blocks
- Asphalt

FEATURES

- Segments** > 13mm / Conical / 4 Deep Draft / SDT
- Core** > Ventilated / Shot-blasted
- Gullets** > Keyhole
- Adhesion** > Laser Welded
- Perform** > Maximum speed of cut & output
- Other** > Low vibration / Undercut protection

DEEP DRAFT SEGMENTS
Give undercut protection, whilst cutting in abrasive materials such as asphalt or abrasive stone

WIDE GULLETS
Clear debris faster when cutting through abrasive materials

COOLING HOLES
Keep the steel core cool. Prevents distortion of core. Keeping the diamond matrix cool in segments will improve speed and life.

CONICAL SEGMENTS
Lower vibration thanks to consistent gap between segments. Increase in product life thanks to greater size of segment and decrease in noise due to less air distortion in motion

SPACED DIAMOND TECHNOLOGY
Grid layout allows each diamond to work optimally and keep cool. Ability to give 100% consistency of performance with all diamond fully utilised at all times
