SPECIFICALLY DESIGNED FOR
BATTERY POWERED SAWS TO HELP
REDUCE NOISE POLLUTION ON SITE

CAN BE USED ON ALL HAND SAWS

ALTERNATIVE PRODUCTS

13MM LASER WELDED CONICAL SEGMENTS

Lower vibration thanks to the consistent gap between segments. Increase in product life thanks to greater size of segment & decrease in noise due to less air distortion in motion

DEEP DRAFT SEGMENTS

Give the diamond blade undercut protection, whilst cutting in abrasive materials such as asphalt or abrasive stone

LASER CUTS IN CORE

With heat resistant rubber inserts to reduce noise

WIDE GULLETS

Clear debris faster when cutting through abrasive materials

THIN CORE

Reduce contact area & therefore noise and dust

SHOT BLASTED CORE

For undercut protection
