DURO SUSTAINABILITY

DURO constantly look to improve our sustainability position throughout everything we do. Internally - Externally - What we supply - What we are supplied - How we operate - How we interact.

We design, develop and source products that support that drive. Cutting, drilling, grinding and breaking are by their nature difficult to make eco-friendly but with every activity and application there may be possibilities to reduce their impact. This is what we strive to achieve in developing our product range.

Enabling the users themselves to operate in a safer environment, an environment that they can have less of an impact on by using DURO & our chosen partners products.

DURO

REDUCED AIR POLLUTION

REDUCED NOISE POLLUTION

REDUCED / NO DUST CREATION

LONGER PRODUCT LIFE

REDUCED ENERGY USE

SAFER TO USE

REDUCED SPARKS

REDUCED MACHINE NOISE

LIGHTER / EASIER TO USE

CLEANER ENVIRONMENTS

REDUCED HEALTH RISK TO USERS

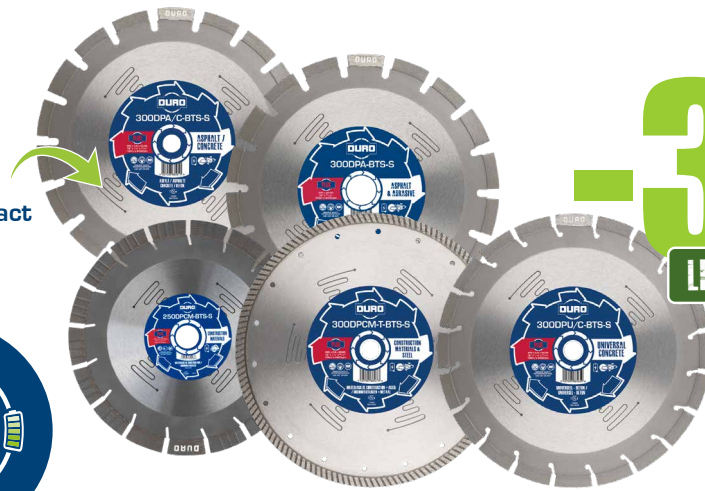

LESS VIBRATION THROUGH TO THE USER

DURO • ECO

BATTERY SAW BLADES

- heat resistant rubber inserts to reduce noise
- super thin cores reduce contact area, reducing noise & dust
- 25% blade noise reduction
- 35% blade & saw combined noise reduction

-35%

LESS BLADE & SAW NOISE

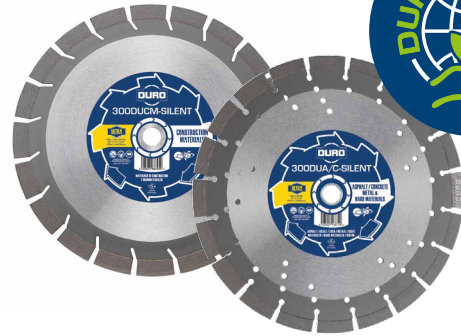

-35%

LESS BLADE & SAW NOISE

SILENT CENTRE BLADES

- multi layered noise reducing cores
- 25% blade noise reduction
- 35% blade noise reduction - when used with electric saws

METAL CUTTING DIAMOND BLADES

- replacing the use of abrasive discs that degrade in use
- no dust creation - 100% less dust
- less spark - 30% less sparks
- no breakage
- environmentally friendly with one disc replacing up to 100 (100 less products used)
- safer to use - SAFER

-100%

DUST FREE

-30%

LESS SPARKS

-100%

SAFER

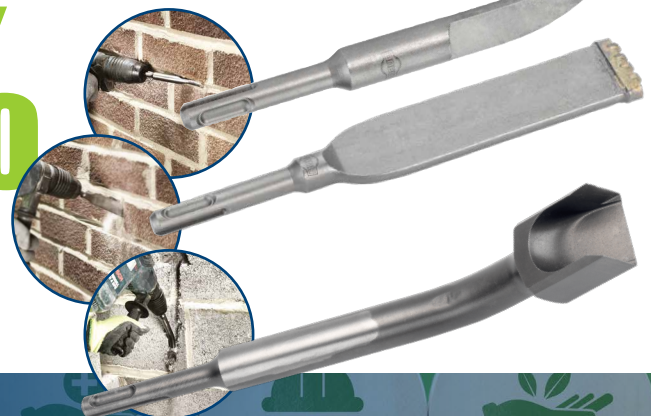

HAMMER ACTION CHISELS

- mortar raking & brick removing chisels - remove mortar in mainly chunks rather than grinding it with a massive reduction in dust creation
- channeling chisels produce electrical conduit channels in masonry type materials & replace the use of diamond blades that create a huge amount of dust
- 80% LESS DUST

-80%

LESS DUST

ENVIRONMENT

LIGHT DUTY DUST FREE CORE DRILLING

- remove dust from core drilling of light building materials with the use of solid barrel cores, hollow core drill adaptors & M class vacuums. A simple but effective development to reduce dust creation into the environment by up to 99%.
- also enabling such core drilling to be undertaken in applications not previously achievable such as internal to housing
- 99% LESS DUST

- DPDC-SOLID DIAMOND CORE DRILLS

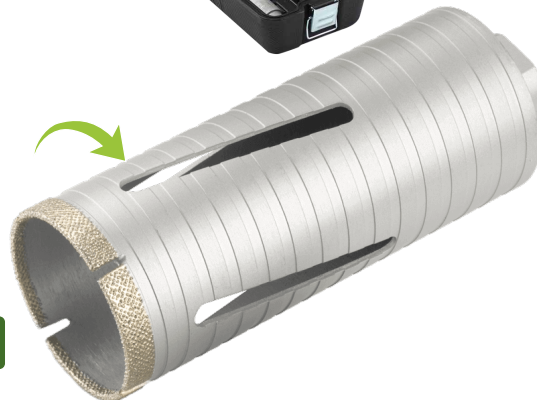

-99%
LESS DUST

-100%
SAFER

-60%
FASTER

-60%
MACHINE WEAR / USER FATIGUE / DUST

DDC-RAPIDE (& 5 PIECE KIT) VACUUM BRAZED DRY DIAMOND CORE DRILL THE FASTEST CORE DRILL AVAILABLE

- vacuum brazed diamond cutting edges replace traditional diamond segments
- giving a huge increase in speed and safety
- Speed gives a massive reduction in energy use, less dust created and 100% safer as there are no segments to lose

HEAVY DUTY DUST FREE CORE DRILLING

-99%
LESS DUST

- remove dust from core drilling of heavy duty building materials with the use of solid barreled cores, hollow core drill adaptors & M class vacuums. A simple but effective development to reduce dust creation into the environment or messy wet slurry creation by up to 99%. Wet building material slurry will eventually turn into concrete type dust after drying. This development can stop that
- 99% LESS DUST

DDCC SEGMENTED CORE DRILLS - FOR RIG MOUNTED USE

DUST FREE CUTTING & DRILLING

WITH DURO DUST SUPPRESSION

WITHOUT DURO DUST SUPPRESSION

DUST SUPPRESSION TANKS

- deliver water direct to the cut either manually powered or battery powered
- suppresses the creation of dust when using diamond blades or diamond cores on masonry materials
- cutting concrete & stone type materials produces huge amounts of dust containing crystalline Silica (RCS) particles which can cause serious health problems to users if exposed to it
- fully replaceable components to ensure longevity of product life
- 100% LESS DUST

DRILL MOTORS

DM52D - DRY DRILLING - HAND OR RIG MOUNTED

DMC6P - WET OR DRY DRILLING - HAND OR RIG MOUNTED

DD62 - DRY DRILLING - HAND OR RIG MOUNTED

- 99% LESS DUST
- core drill motors developed with dust extraction ports and water connectors to effectively enable core drilling to be undertaken dust free. safer for the user creating a dust free environment
- used in conjunction with m class vacuum units and hollow adaptors where required

-99%

LESS DUST

ELECTRIC SAWS

- saws developed to be used in environments where others can't & packed with environmental features - especially when used with DURO noise reduced blades
- producing no petrol fumes, near 100% dust extraction capabilities, lower vibration levels for safer use as well being 10% quieter & 20% lighter than standard saws

-90%

DUST REDUCTION

LESS ENERGY

ELECTRIC TILE & STONE SAWS

- built to ensure the saws are environmentally friendly when in use
- developed with dust extraction ports to reduce dust creation when cutting dry (using an M class vacuum) & water feed inlets to stop the production of the harmful dust particles when cutting wet
- paired with the DURO DUT carbon particle tile blades to achieve the fastest cuts & reduce energy use

ELECTRIC WALL CHASER SAW

- integral dust extraction features
- use with DURO wall chasing blade twin packs enables 95% dust free operation

-95%
DUST FREE OPERATION

BATTERY & ELECTRIC HAND HELD & FLOOR GRINDERS

- used with DURO diamond grinding wheels these grinders have integral dust extraction. This enables 100% dust free grinding of concrete & masonry materials. Enabling indoor use & in confined spaces
- also giving a massive reduction in energy use with reliance on battery power
- battery powered floor grinders give a massive reduction of energy use

-100%
DUST FREE

TRELAWNY VoltMax

BATTERY POWERED OPTION **NEW**

BATTERY POWERED SURFACE STRIPPERS, PLANERS & SCARIFIERS

- developed with our manufacturing partners to massively reduce energy usage with the reliance on battery power
- floor planers and scarifiers feature dust extraction ports for 100% dust free surface preparation

-90%

LESS POWER

ENABLES SELECTED MACHINES TO BE

-100%

DUST FREE

DUST EXTRACTION & VACUUM UNITS

- developed with our partners to link into our expanding range of sustainable products & applications. While the accessory can remain the same the development of the machinery to enable dust extraction means total user safety from concrete dust
- the range of extractors & vacuums have the ability to extract the most harmful levels of dust created through a range of building & maintenance activities
- 100% dust free applications
